SUMMARY

Python developer pursuing an **M.Sc. in Computer Applications and Information Technology**, with hands-on experience building **REST APIs, AI-powered applications, and full-stack web applications** using **FastAPI, Flask, SvelteKit, MySQL, and MongoDB**. Worked on projects involving **Retrieval-Augmented Generation (RAG), automation workflows with n8n, and API development**. Built applications including **AI chatbots, voice assistants, analytics dashboards, and computer vision-based management systems**. Familiar with **Docker, Git, Postman, and modern backend development practices**. Interested in **backend development, scalable application development, and AI-driven solutions**.

EDUCATION

(Bachelor of Science in Computer Application & Information Technology) 3.45/5 • Ahmedabad, Gujarat	K. S School of Business Management and Information Technology	July 2022- April 2025
(Master of Science in Computer Application & Information Technology) 3.64 (Up to semester 7) • Ahmedabad, Gujarat	K. S School of Business Management and Information Technology	July 2025- May 27

PROJECTS

Medical Chatbot (RAG-Based) - Built an end-to-end Retrieval-Augmented Generation (RAG) chatbot capable of answering medical questions from uploaded PDF documents. - Designed a semantic search pipeline using HuggingFace embeddings for high-accuracy context retrieval https://github.com/rathod-pritesh/end-to-end-medical-chatbot-generative-ai	28 March 2026 - 29 March 2026
AI Voice Assistant - Developed a real-time AI voice assistant that processes natural language voice commands using transformer-based intent recognition. - Built REST APIs with FastAPI and integrated a responsive SvelteKit frontend with optimized low-latency communication. - Implemented the full pipeline from audio capture through NLP inference to structured API responses. https://github.com/rathod-pritesh/ai-voice-assistant	August 2025 - December 2025
BuildTrack Construction Management System - Developed a full-stack construction management system covering project tracking, attendance management, and operational reporting. - Integrated OpenCV-based face recognition for automated attendance monitoring. - Built CRUD workflows and a MySQL-backed relational database with a responsive frontend using Flask. https://github.com/rathod-pritesh/BuildTrack-construction-management-system	September 2024 - March 2025
EcommerceTrack - Built a RESTful e-commerce backend to store and analyze consumer purchase data. - Implemented analytics endpoints for top users by spend, revenue by category, and orders by city. - Seeded the database with realistic fake order data using a Faker-powered seed script. https://github.com/rathod-pritesh/EcomTrack/	10 April 2026 - 14 April 2026

SKILLS

Languages

Python, JavaScript

Frameworks

FastAPI, Flask

Frontend

SvelteKit, Tailwind CSS

Databases

MySQL, MongoDB

Tools

Docker, Git

CERTIFICATIONS

Python For Beginners Course In-Depth

June 22, 2024

Udemy

Covers Python fundamentals, object-oriented programming, and real-world application development.

<https://www.udemy.com/certificate/UC-a95c08e7-103e-475b-94df-70ba19d84af8/>

AI Fluency: Framework and Foundations

March 18, 2026

Anthropic

Covers human-AI collaboration and responsible AI use across technical and business domains.

<https://verify.skilljar.com/c/j44zmfhjofi2>

Foundations of Prompt Engineering

May 20, 2026

AWS Skill Builder

Learned core prompt engineering techniques including zero-shot, few-shot, chain-of-thought prompting, RAG, AI reasoning methods, multimodal prompting, and ethical AI practices.
